

GIFTePay adds high speed processing for gift and prepaid transactions to any PC-based business system. Using standard Internet or other TCP/IP virtual private network service, gift/prepaid requests are authorized in as little as 2 seconds. Also, automatic failover to dial backup is available by adding Datacap's fast connect modem, DialLink™.

GIFTePay's client/server architecture is scalable to fit the needs of any size enterprise and is currently operating in businesses ranging from a single register to over a thousand stores. The GIFTePay client, DSIClientX™, is integrated to the POS application and sends encrypted multi-threaded transaction requests to GIFTePay server, which can be located at each store, or at a headquarters location or at a remote payment services operator location. Easily integrated with a single interface for all major prepaid card processors, GIFTePay is relied on by hundreds of PC-based systems developers in various retail and food service segments to reliably and efficiently handle their prepaid requirements.

Fast, Reliable, Secure IP Gift and PrePaid Card Processing for PC/POS Systems

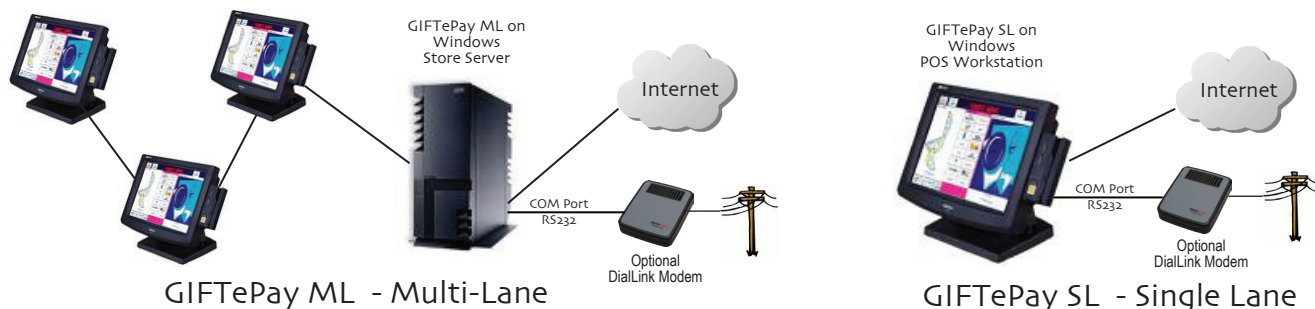

- Supports Gift, Prepaid and Loyalty programs
- Encrypted communications between DSIClientX and GIFTePay, and between GIFTePay and the payment processor
- Single integration to our ActiveX control, DSIClientX, supports all major gift/prepaid processors and all system configurations, including payment services providers operating GIFTePay remotely – no need to deal with various banks or processors for separate integrations
- Controls are included for peripherals such as card readers, PIN pads and check readers
- Can be used independently or in conjunction with NETePay to simultaneously handle all electronic payments
- Free DSIClientX control distribution streamlines installation and support – simply include it with every system
- Single-lane, multi-lane, and central enterprise configurations available
- Selected processing providers absorb GIFTePay license fees, eliminating the up-front cost of GIFTePay servers
- Support for Windows, NT/2000/XP/Vista
- Available via Internet download or shipped on CDs
- Automatic failover to alternate IP addresses/servers for increased reliability
- Back-up store server included with GIFTePay Store Server software
- Automatic dial back-up easily activated via a set-up screen parameter
